Subject: Microsoft Settlement

I really don't understand why the Government is trying to destroy one of the world's best achievements. You can buy a Microsoft product that is reliable and utilitarian for less than what most attorneys charge for 2 hours of their time. Where is the injustice here? Their products will last a lifetime (even though they will be improved upon constantly). This whole thing is a big waste of time and money. Just look at what breaking up the phone company did. We now pay about 5 times as much for less service and have 2 to 3 bills for what once came in one every month! Even if some companies are considered monopolies maybe that is the most efficient way to do some things. Leave Microsoft alone and see if all the lawyers involved can add some utility to the world in stead of profits in their pockets. Settle the suit and let's get on with life and look for things that need fixing.

Sincerely

Rick Salvo
